

ENVIRONMENT & SUSTAINABILITY

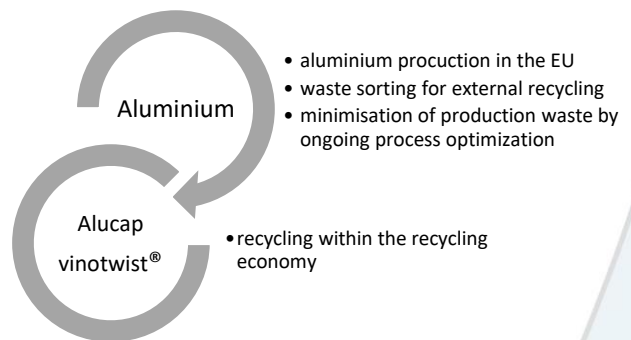

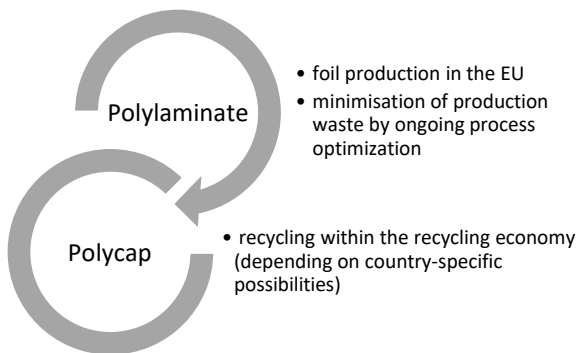

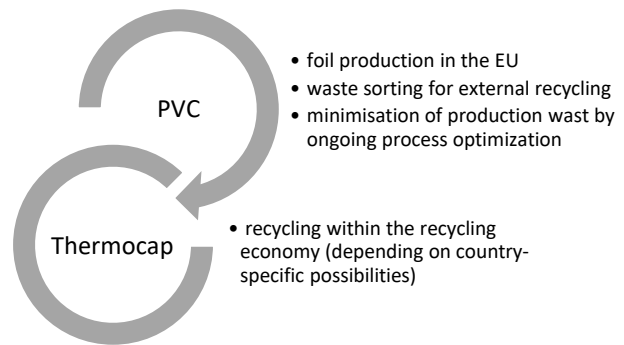

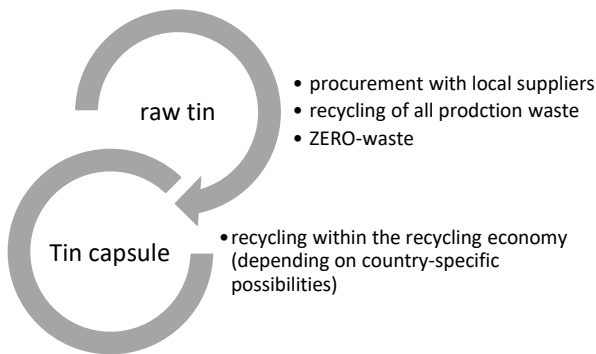

The BT-Watzke GmbH is aware of its responsibility towards the environment and introduces actions to optimise production processes and minimizes stress of any kind and nature at the production site in Pinggau/Austria.

Built up company knowledge since its founding in 1892 was the basis for the newly built production site in 2001 - all production processes, all buildings and building technologies were newly built.

Certification in accordance with ISO 14001:2015 confirms our environmental activities.
